

Artificial Intelligence

Artificial Intelligence, or AI, is the field of creating computer systems that can perform tasks that normally require human intelligence.

AI Applications

Common AI applications include recommendation systems, speech recognition, computer vision, chatbots, and autonomous systems.

Machine Learning

Machine learning is a branch of AI in which models learn patterns from data and use those patterns to make predictions or decisions.

Generative AI

Generative AI creates new content such as text, images, audio, or code based on patterns learned from training data.
